

ICE in April

Tip # 1 (with thanks to Liz Hellewell) -

Police across the US are asking that you program this entry on your cell phone: " ICE " signifying In Case of Emergency.

Your cell phone can be a valuable tool to reach your family in case of emergency. Probably you already have these numbers on your phone but the police would have to know which numbers to call. If you ALSO record the numbers of the people you want called with the name listed as ICE, they can call the correct person right away!

I now have ICE listed twice with two different numbers. Being my usual non-technical self I had trouble getting ICE as all caps. Finally I put a space between the letters and got caps: as in I C E. It's very clear and if the police try one ICE and don't reach anyone they can try the other right away.

Tip #2 This worked so perfectly for me that I thought- ah tell my readers! Please let me know if your reaction is "NOT"!

A SPEEDY way to clean your microwave! From USA weekend ...Apr 6-8,'07 Put a bowl of water with a slice of lemon in it in your microwave and nuke it on HIGH for a few minutes. The good smelling steam makes it amazingly easy to sponge the inside clean and it's totally biodegradable !

That's all for now. If you start doing spring decluttering and hit any snags or roadblocks email me. If something has stopped you, it's probably caught others as well. Feel free to email victories too.

May your spaces support you and what you are trying to do,

Joanna
